Idaho National Laboratory

Minutes Taken By: Barbara Wolt Date of Meeting: **October 6, 2008**		Page 1 of 1
Location of Meeting: **ATR Conference Room**		
OSB Meeting Topic: **NMIS Annual Update of SAR-154 and TSR-154**		
Item	**Description of Discussion**	**Speaker or Actionee**
	Introduction	
1	• Brooks opens meeting and agrees that quorum is meet for OSB: **Members Present:** John Chapman, Brooks Clements, Jack Jacobi, Max Heberling, Linda Reeder **Observers Present:** Jim Harvey, Scott Ullsperger, Barbara Wolt	Brooks Clements
2	Brooks introduces Anne McCartin as presenter of the NMIS Update of SAR-154 and TSR-154	Brooks Clements
3	Anne passed out the SAR/TSR-154 2008 Annual Update Change Summary. She said that it is getting ready to be submitted to DOE next week and that the matrix was approved for 2008 update. She discussed the rack and if there were any problems using both fuel boxes and the effect of both being opened at one time. Reference was made to DOP 7.11.10 and 3.3.2.3.11.2 and stated that controls for both boxes will be needed as the old box is 4.0 and the new ones are 4.2 with a max of 100 on the TSR limit for vault/staging.	Anne McCartin
4	Discussed his concern with the CSI value assigned to the new containers and the limit of 100 for staging area.	Scott Ullsperger
5	• Todd Taylor of Criticality Safety Engineering 6-9656 will be adding a new FFSC in the ATR, ATRC to CSE. • Rhonda Rohe of ATR Life Extension Program 6-9259 will be contacted with ETA of shipment of new boxes. • A. McCartin and S. Ullsperger have to place a note in all procedures that use FFSC's (old and new) to not allow old and new FFSC's to be open at the same time. • Ref: S.154.14	Action Items
