

DOE-ID NEPA CX DETERMINATION

Idaho National Laboratory

SECTION A. Project Title: Installing or Relocating Machinery and Equipment at Idaho National Laboratory

SECTION B. Project Description and Purpose:

Background

Idaho National Laboratory's (INL's) mission is to discover, demonstrate and secure innovative nuclear energy solutions, other clean energy options, and critical infrastructure. INL activities include nuclear energy and homeland security research, development, and demonstration. Battelle Energy Alliance, LLC, (BEA) manages and operates INL. Most INL Site buildings and structures are located within developed areas that are typically less than a few square miles and separated from each other by miles of undeveloped land. In addition to the INL Site facilities, INL manages and operates leased and DOE-owned laboratories and administrative offices in Idaho Falls.

Purpose

BEA and its subcontractors perform installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of the receiving structure. Covered actions include modifications to an existing building, within or contiguous to a previously disturbed or developed area, that are necessary for equipment installation and relocation. Such modifications would not appreciably increase the footprint or height of the existing building or have the potential to cause significant changes to the type and magnitude of environmental impacts.

This CX covers recurring actions that meet the requirements and conditions that are "integral elements" for applying CXs (see 10 CFR 1021, Appendix B to Subpart D, B. Conditions that are Integral Elements of the Classes of Actions in Appendix B). Actions would not individually or cumulatively have significant effect on the human environment; would fit CX definitions, including any caveats for use of the CX; would not have "extraordinary circumstances" [see 10 CFR 1021.410(b)(2)] that may affect the significance of environmental effects of the proposal; and would not be divided into smaller actions (segmentation) to meet CX definitions. CXs include the foreseeable activities necessary for implementing actions, such as award of grants and contracts, site preparation, purchase and installation of equipment, and associated transportation activities [10 CFR 1021.410(d)]. INL's Program Environmental Leads and NEPA Technical Points of Contact (TPOCs) would verify that applicable requirements and conditions are met prior to applying this CX to proposed actions. This includes compliance with the Clean Air Act, Clean Water Act, and other applicable laws and regulations; as well as conformance with applicable NEPA Environmental Assessments (EAs) or Environmental Impact Statements (EISs) and associated Findings of No Significant Impact (FONSIs) and Records of Decision (RODs), designations, policies, and procedures.

These activities may consist of typical actions for the purpose of the installation and relocation of machinery and equipment. In accordance with the limitations on CX B1.31-installation or relocation of machinery and equipment imposed by 10 CFR Part 1021, Appendix B to Subpart D, none of the activities addressed in this ECP include the following:

- Actions that are part of, or in support of, a larger project that requires either an Environmental Assessment (EA) or an Environmental Impact Statement (EIS)
- Actions that change the scope, mission, or hazard categorization of a facility
- Actions that may cause a significant increase in environmental impacts of a facility
- Actions at EBR-I beyond normal custodial work
- Actions that require a permit or permit modification from a regulator (i.e., RCRA permit). In the event a new or modified permit is required, a project specific ECP must be prepared
- Actions for which a separate categorical exclusion is specified in 10 CFR 1021, Appendix B to Subpart D
 - Actions include, but are not limited to, the installation or relocation of contaminated equipment, special nuclear material or related equipment
- Actions with extraordinary circumstances that affect any sensitive area or natural resources, Undertakings determined during the National Historic Preservation Act Section 106 process that may affect historic properties, 36 CFR 800.4(d)(2), federally-listed threatened or endangered (T&E) species or their habitat, federally-proposed or candidate species and their habitat, state-listed or state-proposed T&E species, and other federally-protected species such as Bald and Golden eagles and birds protected under the Migratory Bird Treaty Act (MBTA), floodplains and wetlands, areas having a special designation (e.g., national landmarks), special sources of water (such as sole source aquifers), and involve genetically engineered organisms, synthetic biology, noxious weeds and invasive species)
- Activities that disturb 1) current or potential sagebrush habitat anywhere on the INL Site outside of current facility footprints, 2) native or naturalized vegetation within the INL boundary, Sagebrush Steppe Ecosystem Reserve, or the area between Specific Manufacturing Capability (SMC) and Test Area North (TAN), 3) soil in the INL storm water corridor, or 4) disturb vegetation or soils in the CITRC area (including previously disturbed areas at CITRC)
- Activities that generate transuranic waste (TRU), high-level waste (HLW), Greater-Than-Class C low-level waste (GTCC-LLW), or any waste with no path for disposition

DOE-ID NEPA CX DETERMINATION

Idaho National Laboratory

- An upgrade or improvement that would extend the useful life of a facility
- Activities performed by contractors other than BEA, including University partnerships

"Previously disturbed or developed area" refers to land that has been changed such that its functioning ecological processes have been and remain altered by human activity. The phrase encompasses areas that have been transformed from natural cover to nonnative species or a managed state, including, but not limited to, utility and electric power transmission corridors and rights-of-way, and other areas where active utilities and currently used roads are readily available.

SECTION C. Environmental Aspects or Potential Sources of Impact:

Air Emissions

Activities addressed by this ECP may require an Air Permitting Applicability Determination (APAD) and have the potential to contribute to air emissions through:

- Generating air pollutants, including but not limited to radionuclides, chemical and combustion emissions. Some activities may involve stationary air emission sources, including stationary internal combustion engines
- Generating hazardous and radiological emissions, such as by operation of fuel burning equipment, decontamination work, use of maintenance products that contain hazardous constituents, and disturbance of contaminated soils
- Distributing, excessing, or disposing of appliances containing refrigerants
- Maintaining, servicing, or repairing stationary heating, ventilation, air conditioning and refrigeration equipment.
- Maintaining, testing, or disposing of halon-containing equipment or halon
- Purchasing equipment containing refrigerants or halon
- Acquiring and dispositioning chemicals
- Working with asbestos-containing materials (ACM) that could release friable material to the air.
- Generating fugitive dust or other fugitive emissions
- Purchasing, relocating, operating, modifying, or maintaining portable air emission sources, including non-road internal combustion engines

Discharging to Surface-, Storm-, or Ground Water

Activities addressed by this ECP have the potential to contaminate waters of the United States (U.S.) or groundwater through:

- Construction or modification of drinking water systems and cross connections at the INL and in-town facilities
- Maintaining, repairing, or altering drinking water systems and cross connection at the INL and in-town facilities
- Using drinking water systems and cross connections at the INL and in-town facilities
- Constructing or modifying sewage and other reuse systems
- Maintaining or repairing septic tanks or septic systems
- Discharging Wastewaters
- Managing storm water discharges

Disturbing Cultural or Biological Resources

Activities addressed by this ECP have the potential to disturb cultural or biological resources through:

- Constructing or modifying facilities, structures, equipment or processes
- Maintaining or repairing facilities, structures, equipment or processes
- Management of migratory birds and bird nests on the INL and at in-town facilities

Generating and Managing Waste

Activities addressed by this ECP have the potential to generate waste requiring management through:

- Constructing or modifying facilities, equipment or processes at permitted or interim status Resource Conservation Recovery Act (RCRA) facilities
- Decontaminating equipment containing or contaminated with polychlorinated biphenyls (PCBs) (From equipment manufactured before 1982)
- Maintaining equipment containing or contaminated with PCBs (From equipment manufactured before 1982)
- Disposing asbestos-containing material
- Disturbing asbestos or removing asbestos-containing material
- Generating wastes

DOE-ID NEPA CX DETERMINATION

Idaho National Laboratory

Releasing Contaminants

Activities addressed by this ECP have the potential to release contaminants through:

- Acquiring, using, storing, and dispositioning chemicals
- Managing and dispositioning excess property and materials
- Reporting and cleaning up spills and releases
- Managing elemental lead
- Removing lead from service or from a structure

Using, Reusing, and Conserving Natural Resources

Activities addressed by this ECP have the potential for use, reuse and conservation of natural resources related to:

- Generating greenhouse gasses
- Building energy use
- Consuming potable, industrial or irrigation water
- Generating storm water
- Generating landfill waste or construction and demolition wastes
- Generating recyclable materials
- Providing an opportunity to engage in sustainable acquisition practices

SECTION D. Determine Recommended Level of Environmental Review, Identify Reference(s), and State Justification: Identify the applicable categorical exclusion from 10 Code of Federal Regulation (CFR) 1021, Appendix B, give the appropriate justification, and the approval date.

For Categorical Exclusions (CXs), the proposed action must not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environmental, safety, and health, or similar requirements of Department of Energy (DOE) or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment or facilities; (3) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)-excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources (see 10 CFR 1021). In addition, no extraordinary circumstances related to the proposal exist that would affect the significance of the action. In addition, the action is not "connected" to other action actions (40 CFR 1508.25(a)(1) and is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1608.27(b)(7)).

References: National Environmental Policy Act (NEPA) Implementing Procedures, Final Rule, 10 CFR 1021, Appendix B to Subpart D, Categorical Exclusion B1.31 "Installation or relocation of machinery and equipment."

Justification: The proposed activities are consistent with CX B1.31 "Installation or relocation and operation of machinery and equipment (including, but not limited to, laboratory equipment, electronic hardware, manufacturing machinery, maintenance equipment, and health and safety equipment), provided that uses of the installed or relocated items are consistent with the general missions of

Is the project funded by the American Recovery and Reinvestment Act of 2009 (Recovery Act) Yes No
