

DOE-ID NEPA CX DETERMINATION

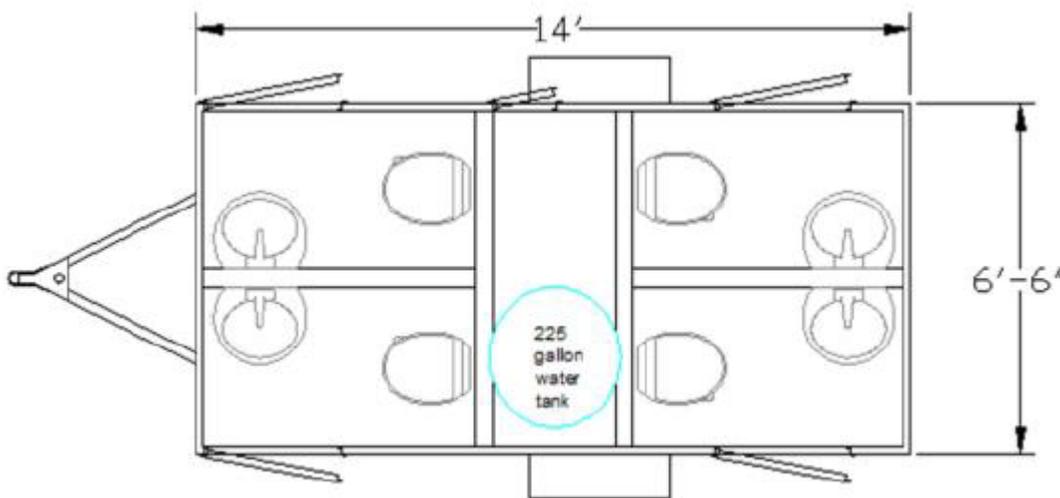

Idaho National Laboratory

SECTION A. Project Title: N&HS Portable Restroom Trailer Purchase and Use

SECTION B. Project Description and Purpose:

The proposed action purchases a portable restroom trailer for use at various Idaho National Laboratory (INL) Site locations to support National and Homeland Security (N&HS) projects. The portable restroom trailer replaces or supplements port-a-potties during N&HS activities. The 14-foot long trailer supplies four separate stations, each with a sink and toilet (see Figure 1). The trailer is self-contained (i.e., no need to connect to water, or sewer utilities). A portable generator will supply electric power unless power is available at various locations.

Figure 1.

SECTION C. Environmental Aspects or Potential Sources of Impact:

Air Emissions

Fugitive dust may be generated while maneuvering the trailer in place. All reasonable precautions will be taken to prevent particulate from becoming airborne.

A portable generator may be used to supply electricity for the trailer when power cannot be supplied by other means. Operation of the generator qualifies for an IDAPA Category II Exemption from permitting as documented in Air Permitting Applicability Determination (APD) INL-18-004.

Disturbing Cultural or Biological Resources

There is a potential to disturb cultural and biological resources if the trailer is parked in areas that have not been previously disturbed. Ground disturbing activities must be reviewed and approved by the Cultural Resource Management office.

Generating and Managing Waste

Project activities will result in the generation of septage and typically industrial waste (paper towels, etc.)

Using, Reusing, and Conserving Natural Resources

The project will practice sustainable acquisition, as appropriate and practicable, by procuring construction materials that are energy efficient, water efficient, are bio-based in content, environmentally preferable, non-ozone depleting, have recycled content, or are non-toxic or less-toxic alternatives. New equipment will meet either the Energy Star or SNAP requirements as appropriate (see <http://www.sftool.gov/GreenProcurement/>).

SECTION D. Determine Recommended Level of Environmental Review, Identify Reference(s), and State Justification: Identify the applicable categorical exclusion from 10 Code of Federal Regulation (CFR) 1021, Appendix B, give the appropriate justification, and the approval date.

For Categorical Exclusions (CXs), the proposed action must not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environmental, safety, and health, or similar requirements of Department of Energy (DOE) or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment or facilities; (3) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)-excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources (see 10 CFR 1021). In addition, no extraordinary circumstances related to the proposal exist that would affect the significance of the action. In addition, the action is not "connected" to other action actions (40 CFR 1508.25(a)(1) and is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1608.27(b)(7)).

References: 10 CFR 1021, Appendix B to Subpart D, B1.15 "Support buildings" and B1.24 "Property transfers."

Justification: Project activities described in this EC are consistent with 10 CFR 1021, Appendix B to Subpart D, item B1.15 "Siting, construction or modification, and operation of support buildings and support structures (including, but not limited to, trailers and prefabricated and modular buildings) within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible). Covered support buildings and structures include, but are not limited to, those for office purposes; parking; cafeteria services; education and training; visitor reception; computer and data processing services; health services or recreation activities; routine maintenance activities; storage of supplies and equipment for administrative services and routine maintenance activities; security (such as security posts); fire protection; small-scale fabrication (such as machine shop activities), assembly, and testing of non-nuclear equipment or components; and similar support purposes, but exclude facilities for nuclear weapons activities and waste storage activities covered in B1.10, B1.29, B1.35, B2.6, B6.2, B6.5, B6.6, and B6.10 of this appendix;" and

B1.24 "Transfer, lease, disposition, or acquisition of interests in personal property (including, but not limited to, equipment and materials) or real property (including, but not limited to, permanent structures and land), provided that under reasonably foreseeable uses (1) there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment and (2) the covered actions would not have the potential to cause a significant change in impacts from before the transfer, lease, disposition, or acquisition of interests."

Is the project funded by the American Recovery and Reinvestment Act of 2009 (Recovery Act) Yes No

Approved by Jason Sturm, DOE-ID NEPA Compliance Officer on: 9/26/2018
