

# DOE-ID NEPA CX DETERMINATION

## Idaho National Laboratory

### SECTION A. Project Title: SMC Temporary Trailer

### SECTION B. Project Description and Purpose:

The conference room in building TAN-678 at the Specific Manufacturing Capability (SMC) is being used as work space for new hires waiting for security clearances. The proposed action leases and installs a temporary (not to exceed 18 months) modular facility to meet the need for additional conference room space. The modular trailer is a 24'x60' double-wide trailer located next to the SMC Medical Dispensary (TAN-1615). Installation requires ground leveling and the trailer to be leveled, blocked, and anchored. Project scope includes installation of prefabricated stairs, handrails, and skirting. A 200amp 240 volt single phase circuit will be pulled from the power pole next to the TAN medical dispensary to provide electricity to the facility. The project does not connect the trailer to water or sewer.

### SECTION C. Environmental Aspects or Potential Sources of Impact:

#### Air Emissions

The proposed action has the potential to generate fugitive dust.

Air emissions from portable electrical generators, in place less than one year, are not regulated.

#### Disturbing Cultural or Biological Resources

The trailer will be located on previously disturbed ground. Disturbance of biological and cultural resources is not anticipated.

#### Generating and Managing Waste

Industrial waste and common office trash will be managed by Waste Generator Services (WGS).

Office paper will be recycled to the extent practicable.

#### Releasing Contaminants

Typical construction chemicals such as fuels, lubricants, adhesives, etc. will be used while installing the trailer. All chemicals utilized by this activity will be managed in accordance with laboratory procedures. Although not anticipated, there is a potential for spills when using chemicals or fueling equipment. In the event of a spill, notify facility PEL. If the PEL cannot be contacted, report the release to the Spill Notification Team (208-241-6400). Clean up the spill and turn over spill cleanup materials to WGS.

#### Using, Reusing, and Conserving Natural Resources

All materials would be reused and/or recycled where economically practicable. All applicable waste would be diverted from disposal in the landfill where conditions allow.

### SECTION D. Determine Recommended Level of Environmental Review, Identify Reference(s), and State Justification: Identify the applicable categorical exclusion from 10 Code of Federal Regulation (CFR) 1021, Appendix B, give the appropriate justification, and the approval date.

For Categorical Exclusions (CXs), the proposed action must not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environmental, safety, and health, or similar requirements of Department of Energy (DOE) or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment or facilities; (3) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)-excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources (see 10 CFR 1021). In addition, no extraordinary circumstances related to the proposal exist that would affect the significance of the action. In addition, the action is not "connected" to other action actions (40 CFR 1508.25(a)(1)) and is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1608.27(b)(7)).

**References:** 10 CFR 1021, Appendix B to Subpart D, item B1.24 "Property Transfers" and B1.15 "Support buildings."

**Justification:** Activities are consistent with 10 CFR 1021, Appendix B to Subpart D, item B1.24 "Transfer, lease, disposition, or acquisition of interests in personal property (including, but not limited to, equipment and materials) or real property (including, but not limited to, permanent structures and land), provided that under reasonably foreseeable uses (1) there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment and (2) the covered actions would not have the potential to cause a significant change in impacts from before the transfer, lease, disposition, or acquisition of interests;" and

**DOE-ID NEPA CX DETERMINATION**  
**Idaho National Laboratory**

B1.15 "Siting, construction or modification, and operation of support buildings and support structures (including, but not limited to, trailers and prefabricated and modular buildings) within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible). Covered support buildings and structures include, but are not limited to, those for office purposes; parking; cafeteria services; education and training; visitor reception; computer and data processing services; health services or recreation activities; routine maintenance activities; storage of supplies and equipment for administrative services and routine maintenance activities; security (such as security posts); fire protection; small-scale fabrication (such as machine shop activities), assembly, and testing of non-nuclear equipment or components; and similar support purposes, but exclude facilities for nuclear weapons activities and waste storage activities covered in B1.10, B1.29, B1.35, B2.6, B6.2, B6.5, B6.6, and B6.10 of this appendix."

Is the project funded by the American Recovery and Reinvestment Act of 2009 (Recovery Act)       Yes     No

Approved by Jason Sturm, DOE-ID NEPA Compliance Officer on: 4/11/2018
