

RESL Ribbon Cutting

DOE-Idaho and contractor officials get ready to snip the ribbon on the new Radiological and Environmental Sciences Laboratory, located at the INL Research Center in Idaho Falls. The new lab replaces an aging facility located on the INL Site. The mission of RESL is to provide measurement quality assurance for programs that protect workers, the public and the environment.

Dignitaries including Deputy Assistant Secretary Shane Johnson and local government leaders joined Radiological and Environmental Sciences Laboratory employees and DOE-ID management for a ribbon-cutting ceremony for their new laboratory facility recently. The lab, located at the INL Research Center in Idaho Falls, replaces an aging facility at the INL Site.
