

DOE Seeks Office Spaces for its Idaho Environmental Management Team

The U.S. Department of Energy (DOE) is seeking local office space here to support the Office of Environmental Management's cleanup mission at the Department's Idaho Site. DOE is looking to possibly lease approximately 16,000 to 18,000 square feet of new or existing general office space. The desired location for this leased office space will be located within the boundaries of: Snarr and Iona Road to the North; Woodruff Avenue to the East; Sunnyside Road to the South and 35th Avenue to the West.

It is requested that proposals include photos and layout sketches of the offered facility or facilities. Specific facility information of interest, such as energy saving materials and construction details should be included in the proposal. A square footage lease estimate for the facility or facilities, tenant improvements, telecommunications infrastructure and any other related costs should also be included in the proposal.

The Government is considering whether to remain in its existing space or relocating to alternative space. In making the determination to relocate the Environmental Management office functions, the Government will consider total costs likely to be incurred through relocating.

Proposals must be received by DOE by 5 p.m. (Mountain Daylight Saving), June 5, 2009. Proposal may be submitted to: Bud Sokolovich, CRS Realty Officer, Environmental Management Consolidated Business Center 250 E. Fifth Street, Suite 500 Cincinnati, OH 45227

For additional information contact Bud Sokolovich at: 513-246-0595, or:
